

# History of the atom POSTER

- You will make a poster showing the evolution of atom over time.
- All writing must be done BY HAND, no copy paste off the internet!
- Only print portraits of the scientists.

Your poster must include:

1. A model of each of the versions of the atom.
2. An explanation of the changes made to each model.
3. Information about the scientist who designed each model including:
  - The dates he lived & Died
  - The year of his discovery / location
  - A picture of the scientist
  - Info he added to the model of the atom
  - Model of the atom
  - One interesting fact about the scientist
  - The equipment that they used to make their discover WITH and explanation of how it worked.
4. At least **SEVEN** different versions of the atom.

Grading:

- A completed project with all criteria met will receive a minimum grade of 85. Higher grades will be given based on creativity and quality.
- Incomplete projects will be marked incomplete and returned to the student so changes can be made.
